

PREVENTION PROTECTION SERVICE SPECIAL HAZARDS

Preventing the risk of fire with safe and reliable hypoxic air-venting technology.

Revolutionary
The ARA FirePASS® cutting-edge technology reduces and maintains oxygen at noncombustible levels to prevent fire from occurring.

Safe
Through carefully controlled oxygen reduction, ARA FirePASS® creates safe, breathable environments while preventing fire ignition.

Reliable
Eliminating damage and business interruption, ARA FirePASS® proactively prevents fire before it occurs.

Offering custom designed products for all aspects of fire protection.

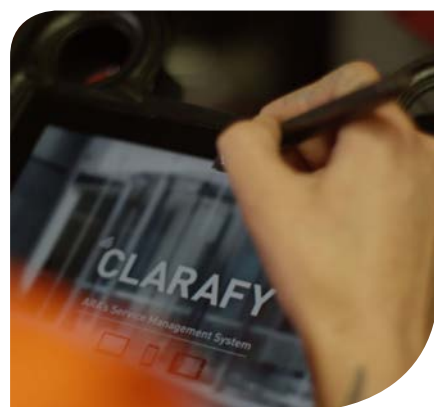

Custom-designed
Equipping Australian facilities with innovative fire protection solutions tailored to your needs.

Knowledgeable
Through comprehensive industry experience and expertise, our team of technicians provides unparalleled protection.

Extensive
We deliver an extensive range of fire protection, from sprinkler, detection and EWIS Systems, to portable systems and passive fire doors.

Providing service transparency and 24/7 support in managing all of your fire protection systems.

Clarafy® Service Management System
Our innovative asset management system tracks and schedules maintenance for all of your on-site fire equipment. Our transparent web based portal makes all information visible.

Reactive Support
We deliver immediate support through our emergency hotline, connecting you to technicians ready to assist 24/7.

National Coverage
Through a vast network of dedicated technicians and agents, we provide service and maintenance to all of Australia.

Assessing risk and designing top solutions to minimise fire risk in any scenario.

Detection
Minimising the risk of fire, we design and install specialised fire detection services in industrial, commercial and recreational sectors.

Suppression
We equip facilities with specially engineered water, foam and gaseous suppression systems to protect against the threat of fire.

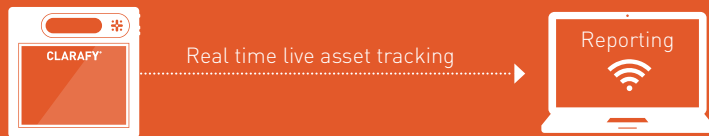

Restaurant & Vehicle Protection
Our specialised restaurant and vehicle suppression systems reduce hazardous situations plus downtime through cost effective suppression systems.

Providing innovative, reliable solutions for all aspects of fire protection.

ARA's Service Management System

CLARAFY® provides up-to-date information about our clients' assets, including a complete history of all associated faults and maintenance activities, visible to our clients via a web based portal.

ARA uses CLARAFY® to efficiently service our clients' assets and provide transparency across all facets of our service business.

How it works

ARA technicians use a mobile device to record the inspection, testing and maintenance they do. The work is completed, the customer signs for it on the mobile device and the information is sent back into our system. Our clients have access to a web-based portal, so everything we do is completely transparent.

Where we are

OUR VISION

To provide innovative solutions to prevent fire and service fire equipment to ensure the safety of our customers and their property. We provide complete transparency to our customers of their fire protection assets and our services.

- Edward Federman | Managing Director
